GTA 5 for Android: What's New And What's Changed? There is no official version for this release of GTA 5, because Rockstar Games wants to provide the latest version for all players, which is not available on other platforms. You can see what has changed in GTA 5 for Android in the following list: Weapon changes: LMGs and Thompson have been removed from GTA Online, but they are still available in single player mode; LS-130 now uses .308 ammo. The range of the sniper rifle has been increased to more than 1 km. Most weapons have had their overall damage increased, which results in an overall increase of damage. The map editor has been removed from GTA Online; the custom race and deathmatch categories have been merged to improve traffic and save space; it is possible to disable parachuting in single-player mode; the player will now be able to swim across rivers. The multiplayer mode will support up to 64 players (16 teams); the player can use a rocket launcher for heavy weapon; we will be able to parachute into water if we want; it is possible to transfer vehicles between friends and other players through the in-game app. How To Download GTA 5 For Android Using iEmulator?
